DATA POLICY

Dear User,

We are pleased that you are using and enjoying the benefits of EzyRegister. Following is a short and simple list describing how we handle data in EzyRegister.

1) All data in EzyRegister app is stored locally in the app. No captured data is being sent to any remote storage location.

2) All captured data in EzyRegister app is encrypted.

3) We will not be using any of the captured data in any way, as we do not have it.

4) There is a one-time sync upon EzyRegister app launch to check for app updates. This is also managed by Apple App Store and Google Play Store.

5) Responsibility for the captured data that is shared or exported out of EzyRegister app lies with you, the user. You agree that we will NOT be held liable for any misuse of the exported data in any way.

That is about all we want to say about data policies.

Thank you.

From: The creators of EzyRegister (CAPPS SOLUTIONS)
